

Relational Database Design – Company Schema

1. Design the Company Schema given in the text book named “Fundamentals of Database Systems” authored by Ramez Elmasri and Shamkant B. Navathe. The e-copy of the text book is uploaded in the moodle.
2. Execute basic queries (Chapter 5) in Company Schema involving only two tables: Employee and Department to simulate the following keywords:
CREATE, DELETE, UPDATE (or MODIFY), INSERT, ALTER, Entity Integrity Constraints and Referential Integrity Constraints.
3. Execute all the example queries in Chapter 6 pertaining to the Company Schema you have created in Q. No. 1.

---THE END---
